

Local Loop Unbundling – Jumpering Work

BT

Throughout England

Value: £10m per annum

As part of BT undertakings to un-bundle the local loop, Morrison is working for BT Openreach to deliver the connections that enable broadband roll-out in the UK.

The work will employ in excess of 200 people across England and involves:

- Jumpering connections in BT exchanges
- Running and terminating internal wiring
- Working on Openreach Main Distribution Frames and service provider equipment
- Working in confined spaces
- Working out of hours as necessary to realise critical delivery timescales

There is a particular emphasis in this contract, not only to provide a leading quality, safe, and operationally efficient service, but also a service that demonstrates continuous improvement and whole-life cost reductions.

All services are provided to the leading industry standards including OHSAS 18001, ISO 14001 and ISO 9001.
