MORRISON UTILITY SERVICES ACHIEVES GOLD MEDAL IN RoSPA 2008 AWARDS

Morrison Utility Services is delighted to have been awarded a gold medal at the 2008 RoSPA Occupational Health & Safety Awards – an award which is presented to companies that have achieved between five and nine consecutive gold awards or better.

Since 2003, Morrison Utility Services has been awarded two gold awards, two sectors awards (in the construction sector), one commended award and the gold medal.

The RoSPA awards are not just about reducing the number of accidents and cases of ill-health at work, they are also about ensuring that organisations have good health and safety management systems in place. They help to reinforce the message that good health and safety is good business and clearly demonstrate an organisation's commitment to the achievement of high levels of performance in this crucial area.

Morrison Utility Services continue to make year on year improvements in its safety performance and currently has an industry-leading AFR of 0.17. This is a result of a safety culture being embedded in the business, through improved safety communication and on-the-job training.

Charles Morrison, Chief Executive Officer of Morrison Utility Services said, "I am delighted that RoSPA has chosen to recognise us once again. Having won the

Construction Sector Award in 2005 and 2006, and being commended in 2007, we are delighted to remain in the top companies once again. Without a doubt, the most important thing in our business is to make sure that each and every one of our employees goes home safe to their families each night. I'm therefore delighted that we are continuing to strive to improve our safety record."

Charles continued, "Safety is our licence to operate and in receiving this gold medal, we are able to demonstrate the skills and safety commitment of our entire workforce. I would like to commend each and every one of them for their continued support in establishing and promoting a safety culture across our business."

- ENDS-

Notes to Editor:

Morrison Utility Services is one of the UK and Eire's leading service providers within the electricity, gas, telecommunication and water sectors. Our service offerings are centred on the provision, replacement, repair and maintenance of utility infrastructure, which our clients own and utilise to deliver water, power, energy and communications to their customers.

Morrison Utility Services is committed to working closely with our clients, to deliver cost effective solutions, which do not compromise safety, quality and service delivery.
