

Access Network Contract

eircom

Republic of Ireland

Term: 2 year (until 2009)

Value: €20m per annum

Morrison Utility Services has won a contract to provide cable and jointing, poling and civil engineering build and maintenance services on eircom's telecommunications infrastructure in Ireland.

The work will employ more than 300 people in Ireland in Year 1 and will involve:

- Major and minor network repairs
- Capital build works
- New developments roll-out
- Provision of service
- Emergency network services

Morrison Utility Services has a proven track record of managing access network contracts both in Ireland and in the UK.

This contract provides for a 365 days a year, 24 hours a day service with all work undertaken within strict time and quality constraints. Electronic supporting systems will be used to deliver operational efficiencies and increase communication between eircom and Morrison Utility Services.
